For Immediate Release

## RSNA® announces 2012 Pricing for *Radiology* and *RadioGraphics*

**Prices to marginally increase for 2012 subscription term**

**(OAK BROOK, Ill.) June 7, 2011**—In an effort to keep up with the rising costs of online journal maintenance, subscription prices for 2012 will be slightly increased for both RSNA journals, *Radiology* and *RadioGraphics*,

The RSNA subscription model is based on the online journal and standard rates reflect online access only. Print editions of the journals are offered as an optional add-on.

Licenses can be obtained for corporate and multi-site organizations such as hospitals, academic institutions, or corporate entities. License pricing is customized.

*Radiology* online features an easy to navigate homepage as well as podcasts, discussion boards, videos, and monthly poll for more peer-to-peer interaction and understanding. *Radiology* now offers the opportunity to obtain CME credits in selected articles and its 6.341 impact factor is the highest of any diagnostic radiology journal. It is also the most cited journal in the field, with nearly double the number of citations of the closest competitors.

*RadioGraphics* is the only journal devoted to publishing the best in peer-reviewed educational materials from the RSNA annual meeting—the premier scientific and educational meeting in radiology. With its high quality images, *RadioGraphics* is read by two out of three radiologists and is widely used as a source for earning CME credits toward maintaining professional certification.

For up to date journal news, content, and more, follow us on Facebook (RSNAradiology; RadioGraphics) and Twitter (radiology\_rsna; RadioGraphics)

###

RSNA is an association of more than 46,000 radiologists, radiation oncologists, medical physicists and related scientists committed to excellence in patient care through education and research. The Society is based in Oak Brook, Ill. ([RSNA.org](http://RSNA.org))
