SUBJECT: SEPTEMBER IS PROSTATE CANCER AWARENESS MONTH

Time: 30 seconds

September is Prostate Cancer Awareness Month.

Prostate cancer is the second deadliest cancer in American men. Increased age and a family history of the disease are the major risk factors. The disease is more common among African-American men.

Treatment may include radiation therapy, surgery, or other methods.

Experts tell men to begin yearly prostate cancer screenings at age 50. If you're at higher risk, start your screenings between 40 and 45.

For information on prostate cancer, visit RadiologyInfo.org. That's RadiologyInfo dot O
