Creative Use of Videos and Advanced PowerPoint Techniques

Mahesh Thapa, MD
Associate Professor
University of Washington & Seattle Children's

Disclosures

· Coauthor of *Cool Technology for Academic Medicine (with shameless emphasis on Radiology)*
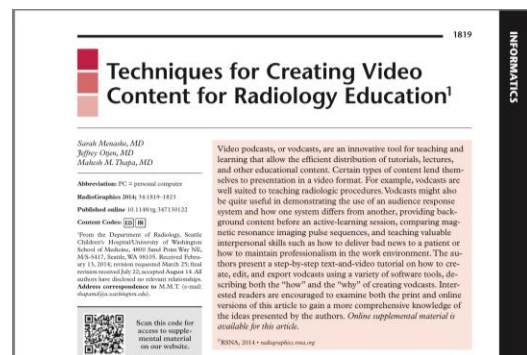

Objectives

By the end of this lecture, the audience will be able to:
· extract video from a PowerPoint presentation
· describe at least two methods to create educational video content.
· define "Screencasting" and "Touchcasting."
· reiterate some benefits of using mobile PowerPoint.

Teacher of the Year

Extract Video from PP

Screencast

A screencast is a digital recording of computer screen output, also known as a video screen capture, often containing audio narration.
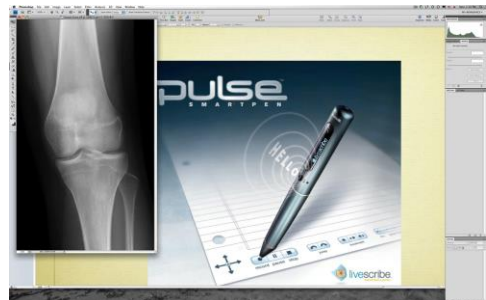

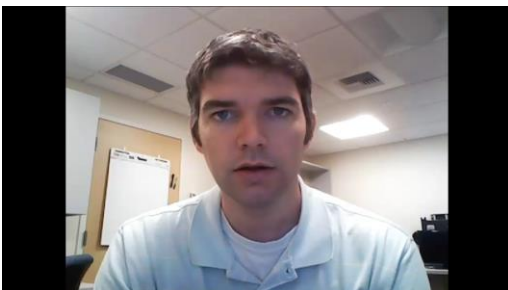

Screencasting

Copernicus (Mac)   CamStudio (PC)   AviScreen (PC)

Jing (Mac & PC)

ScreenFlow

Camtasia

## Explain Everything

Explain Everything

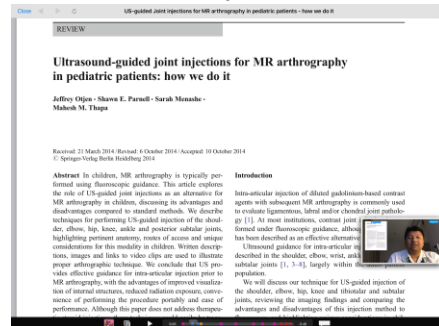

Explain Everything

PowerPoint

Touchcast

An **INTERACTIVE** video with embedded content such as files, web pages, images, other videos, and apps.

Show a sample Touchcast

Wonderfully Interactive

Self Assessment

Polling

Embed lots of content

Touchcast limitations

- Currently only available for iOS devices.

- One of the newer generation iOS devices is recommended to create content.

- Exporting content to video outlets such as YouTube and Facebook looses interactivity.

Show how to make ARS
