Introduction to the Problem:

- The number of radiologic studies has decreased, the problem still exists
- Cause of the problem has changed
- The dashboard is the result of the the radiology department or lost

Materials and Methods:

- Dashboards serve as a tool for the department to monitor its performance and identify areas for improvement.
- The dashboard is a visual representation of the radiology department's performance, allowing for easy identification of trends and patterns.
- The dashboard is designed to provide a clear and concise overview of the department's performance, including metrics such as turnaround time and productivity.

Discussion:

- The dashboard was successful in decreasing the turnaround time for radiology reports.
- The dashboard was able to identify problem cases and provide solutions.
- The dashboard was effective in improving workflow and productivity, resulting in a decrease in the number of outstanding reports.
- The dashboard was able to monitor the department's performance over time, allowing for continuous improvement.

Conclusion:

- The dashboard was effective in decreasing the turnaround time for radiology reports.
- The dashboard was able to identify problem cases and provide solutions.
- The dashboard was effective in improving workflow and productivity, resulting in a decrease in the number of outstanding reports.
- The dashboard was able to monitor the department's performance over time, allowing for continuous improvement.
