

Building Connections Across the Americas: Addressing Access to Radiology

Phase 1: RSNA Annual Meeting

Wednesday, Nov. 30, 2022

“During times when connectivity and collaborative partnerships are more important than ever for the practice of Radiology, the Committee on International Radiology Education (CIRE) of the RSNA is taking this opportunity to build long lasting and solid bridges between institutions, industry, and radiologists across the Americas.

Building Connections Across the Americas will address relevant aspects of the practice of Radiology and education in resource-limited areas, aiming to promote networking, knowledge sharing and optimal resource allocation to improve patient care. Aligned with the educational mission of the RSNA, this session is an outstanding opportunity for radiologists around the world to learn about the efforts our organization has in place to build connections and bring resources closer to where they are needed.”
