

MI radiotracers:

NAME of FDA-approved radiotracer	Description
18-F-FDG	glucose, oncology, inflammation, infection
18-F florbetaben	florbetaben, florbetapir, flutemetamol: beta-amyloid, Alzheimers
68-Ga	agents such as for receptor imaging; ex. DOTATATE: somatostatin receptor, neuroendocrine tumors
18-F sodium fluoride	bone, tumor imaging
11-C-choline, 18-F Fluciclovine	choline and amino acid transporter, prostate cancer
82-Rubidium chloride	perfusion, cardiac
NAME of Internationally-approved radiotracer	Description
To be added	
NAME of non-radioactive contrast agent	Description
Definity	used for ultrasound applications
