SUBJECT: NOVEMBER IS NATIONAL LUNG CANCER AWARENESS MONTH

Time: 30 seconds

November is National Lung Cancer Awareness Month.

Lung cancer is a leading cause of death in the United States. Smoking is a major cause of lung cancer, but even if you've never smoked, you can still be at risk.

Research shows that early detection with C-T screening can lower the risk of death in certain high risk persons based on their age, general health, and smoking history.

For more information visit *RadiologyInfo.org*.
