

GRANTS & AWARDS

2019 RSNA R&E Foundation

Seeding the Future of Radiology

2019

Each year the RSNA Research & Education Foundation strives to successfully meet the needs of our ever-evolving field. It's because of generous donors like you that we can confidently rise to meet these challenges as medical science and technology continue to advance at an accelerated pace.

The growth of our specialty depends on generous donors like you. And for your continued commitment to seeding the future of radiology, we want to sincerely thank you.

In 2019, the Foundation's Board of Trustees approved grant funding of more than \$5 million to provide research and education for individuals at 48 institutions. This support will help equip the next generation of radiologists to engage in critical research. For every \$1 awarded by the Foundation, our grant recipients yield \$50 in subsequent grant resources from other funding sources like the NIH – a return on investment totaling nearly \$3 billion.

Funds awarded this year represent a 30% funding rate of grant applications received by the Foundation's Board of Trustees. The approved funding includes two new multi-year Education Innovation Grants, and three new multi-year Education Development Grants. In fact, a record number of medical students will also receive funding this year because of these critical investments.

To ensure that future investigators, researchers and radiologists can continue making groundbreaking discoveries, we need your continued support.

None of this success would be possible without your incredible generosity. Please join us in this exciting time as we work together to not just meet our goals, but to exceed them.

We deeply appreciate your commitment to planting the seeds today for radiology's tomorrow.

Thank you for supporting the Foundation.

Sincerely,
Thomas M. Grist, MD
Chair, R&E Foundation
Board of Trustees

GRANT AND AWARD DESCRIPTIONS

RESEARCH SCHOLAR GRANT

The Foundation's premier career development grant is designed to transition junior faculty to independent investigators. Funding protects research time to conduct complex projects under the guidance of a mentor and scientific advisor.

RESEARCH RESIDENT/FELLOW GRANT

This grant provides investigators a chance to explore powerful ideas and gain insight into specific investigations and practice research methods and techniques.

EDUCATION SCHOLAR GRANT

Innovation in education can transform the way radiologists learn, understand and care for patients. This grant encourages development of new methods of teaching and evaluation, and enables effective delivery for lifelong learning.

RESEARCH SEED GRANT

Every great discovery starts with a spark. This grant provides seed money to test hypotheses and conduct pilot studies to prepare major grant applications to corporations, foundations and government agencies.

RESEARCH MEDICAL STUDENT GRANT

Exposure to radiology in medical schools ignites a passion and encourages students to consider academic radiology as an option for their future. A summer project can turn into a career-long pursuit of research and discovery.

RSNA/AUR/APDR/SCARD RADIOLOGY EDUCATION RESEARCH DEVELOPMENT GRANT

This grant helps to build a critical mass of radiology education researchers and promotes the careers of those with passion to advance the science of radiology around the world.

EDUCATION INNOVATION GRANT AND EDUCATION DEVELOPMENT GRANT

These grant opportunities fund projects with original and fresh approaches to educational content and products. The goal is to improve upon tools and methodologies currently used in radiology education in order to prepare the next generation of radiologists. Topics for these grants are announced annually in March.

WHERE DO YOUR DONATIONS GO?

Low overhead puts more of your donations toward grant funding

HOW ARE GRANT DOLLARS DISTRIBUTED?

Percent of grant dollars awarded by grant type in 2019

RECOGNITION AND THANKS

Through the generosity of our donors, the RSNA R&E Foundation is able to continue its investment in R&D for radiology.

The Foundation acknowledges the distinguished individuals and the Visionaries in Practice (VIP) program donors who have established endowments and awards in their names or in the names of those honored.

Strategic Radiology

The Foundation is grateful for the major contributions from corporate donors through the Vanguard program.

RESEARCH SCHOLAR GRANT

“The RSNA Research Scholar award will provide me with much needed protected research time to study immunologic effects evoked by therapeutic ultrasound during treatment of patients with prostate cancer. Given the ability of therapeutic ultrasound to evoke an immune response with minimal invasiveness and toxicity, it is an attractive option to apply in combination with immunotherapeutic drugs in patients suffering from immunologically ‘cold’ cancers, like prostate cancer, which do not respond well to immunotherapeutic drugs given in isolation.”

RESEARCH RESIDENT/FELLOW GRANT

Siemens/RSNA Research Fellow Grant Recipient Brian Park, MD (right) and Research Resident Grant Recipient Jamaal Benjamin, MD, PhD (middle) with Scientific Advisor Terence Gade, MD, PhD

“The Dr. Alexander Margulis Siemens Healthineers/RSNA Research Fellow Grant allows me to continue my passion for research at the interface of medicine and engineering. The successful completion of our project will allow procedures to be performed more safely and efficiently with less radiation. This research epitomizes multidisciplinary collaboration, bringing together radiologists, surgeons, computer scientists and engineers, to achieve the common goal of improving patient care.”

— BRIAN PARK, MD

“The RSNA Research Resident Grant will provide me funding and time to investigate the mechanisms via which cancer cells survive the ischemic tumor microenvironment that occur following transarterial chemoembolization (TACE). Our rat model allows us to evaluate pharmacologic inhibitors of core HCC survival pathways allowing our findings to be quickly translated to clinical practice.”

EDUCATION INNOVATION/ DEVELOPMENT GRANT

“The RSNA Education Innovation Grant will enable me to develop and evaluate a point-of-care educational tool showing study specific infographics displaying the location and types of recurring real-world errors and associated example cases. This will be based on analysis of resident preliminary interpretation/attending final report discrepancy and attending peer review data collected from two large academic radiology departments over 10 years. Knowledge of these past errors may reduce the likelihood of making similar mistakes in the future.”

ROENTGEN AWARDS

Roentgen Resident/Fellow Research Award recipient Mark D. Sugi, MD (right) with Program Director of Radiology, Maitray D. Patel, MD of Mayo Clinic Arizona.

“It’s an honor to receive this award in the company of so many talented young investigators. Each of our contributions to research, as small as they may be, can ultimately improve the outcomes and quality of life for our patients. I’d like to thank my research mentors, especially Dr. Cooky Menias and Dr. Michael Gotway, for stimulating my interest in saving interesting cases and encouraging curiosity in the reading room.” -
