Radiologist Perspective Report: *Artificial Intelligence 2023/2024*

**TABLE OF CONTENTS**

1. Organizational Overview
2. Survey Objectives
3. Respondent Profile
   a. Demographics by region, country, practice type, experience level, modality, work setting, and subspecialty
4. Key Findings & Recommendations for Industry Business Managers
5. AI Product Type Comparison
   a. Comparison of AI for clinical workflow prioritization vs. diagnostic assistance
      i. Belief in product usefulness
         1. by practice type
      ii. Adoption, mandated use, and level of trust
      iii. Product mix
         1. by region
         2. by subspecialty
         3. by practice type
   b. AI for clinical workflow prioritization
      i. Belief in product usefulness
         1. global
         2. by region
         3. by subspecialty
         4. by practice type
      ii. Adoption, mandated use, and level of trust
         1. global
         2. by region
         3. by subspecialty
         4. by practice type
   c. AI for diagnostic assistance
      i. Belief in product usefulness
         1. global
         2. by region
         3. by subspecialty
         4. by practice type
      ii. Adoption, mandated use, and level of trust
         1. global
         2. by region
         3. by subspecialty
         4. by practice type
6. Barriers, Future Intent, and Sourcing of AI Products
   a. Barriers to AI adoption
      i. global
      ii. by region
      iii. by subspecialty
      iv. by practice type
   b. Future intent for AI adoption
      i. global
      ii. by region
      iii. by subspecialty
      iv. by practice type
   c. Sourcing of AI products
      i. global
      ii. by region
      iii. by subspecialty
      iv. by practice type
7. USA Special Report
   a. AI utilization
      i. Comparison of AI product utilization – for clinical workflow prioritization vs. diagnostic assistance
         1. Belief in product usefulness
            a. by practice type
         2. Product mix
            a. by subspecialty
            b. by practice type
      ii. AI for clinical workflow prioritization
         1. Usefulness
            a. by subspecialty
            b. by practice type
         2. Adoption, mandated use, and level of trust
            a. by subspecialty
            b. by practice type
      iii. AI for diagnostic assistance
         1. Usefulness
            a. by subspecialty
            b. by practice type
         2. Adoption, mandated use, and level of trust
            a. by subspecialty
            b. by practice type
   b. Barriers, Future Intent, and Sourcing of AI Products
      i. Barriers to AI adoption
         1. by subspecialty
         2. by practice type
      ii. Future intent for AI adoption
         1. by subspecialty
         2. by practice type
      iii. Sourcing of AI products
         1. by subspecialty
         2. by practice type
