RSNA 2026 ADDITIONAL STORY IDEAS

In addition to the presentations described in RSNA news releases, the following presentations have been identified as particularly newsworthy. Times, locations and abstracts for the presentations can be found in the RSNA 2026 Meeting Program.

Scientific Presentations

Sunday, Nov. 29, S2-SSRO01-5, *Clinical Outcomes Following Low-Dose Radiation Therapy for Osteoarthritis: A Single-Institution Retrospective Study*, Medha Gupta, B.S.

Monday, Nov. 30, M7-SSNR03-8, *Comparing Resting State Networks in Religious and Non-Religious People*, Suvarna Badhe

Monday, Nov. 30, M7-SSNR04-4, *Hepatic Fat Is Associated with Accelerated Brain Aging, Neuroinflammation, Reduced Cerebral Blood Flow, and Cortical Atrophy: A Multimodal Neuroimaging Study*, Soheil Mohammadi, M.P.H., M.D.

Monday, Nov. 30, M6-SSMS01-5, *Alterations in Muscle, Bone, and Adipose Tissue Associated with Weight Change in GLP-1 RA Users Mirrors Controls*, Benjamin Rush

Monday, Nov. 30, M3-SSBR03-1, *Dynamic AI Risk Score Trajectories Predict Near-Term Breast Cancer: Integrating Temporal Trends with Actionable Thresholds for Earlier Intervention*, Leslie Lamb, M.Sc., M.D.

Tuesday, Dec. 1, T7-SSNR08-8, *MRI Reveals Persistent Subclinical Cerebrovascular Injury in Youth Contact-Sport Athletes: Comparative Sensitivity of CVR and CBF Across Two Seasons*, William Morgan

Tuesday, Dec. 1, T7-SSMK07-3, *Worth a Shot: Assessing Longitudinal Changes in Patient Reported Pain Scores after Platelet-Rich Plasma Injections for Musculoskeletal Pain*, Rachel Lukose

Wednesday, Dec. 2, W7-SSNR11-8, *Quantitative pCASL Imaging Reveals Adiposity-Associated Cerebral Hypoperfusion in Cognitively Normal Midlife Adults*, Mahshid Naghashzadeh, Ph.D., M.Sc.

Thursday, Dec. 3, R6-SSNR15-4, *Hypertension Is Independently Associated with Globus Pallidus Calcification in Young Adults with Respect to Age*, Nathan Barber

Scientific Posters

Sunday, Nov 29, S3A-SPER-1, *Radiologic Characterization of Intimate Partner Violence Survivors with Cognitive Disorders and Mental Health Disorders in Postmenopause*, Bethany So, B.A.

Sunday, Nov. 29, S3A-SPMS-2, *Phenotypes Derived from Body MRI and Metabolic Function Are Associated with Measures of White Matter Neuroinflammation and Fiber Density: A Diffusion Basis Spectrum Imaging Study*, Mahsa Dolatshahi, M.P.H., M.D.

Monday, Nov. 30, M5A-SPNR-5, *Short-Term Dietary Intervention Mitigates Brain Aging and Enhances Memory in Obese Patients: An MRI Structural Study*, Yue Qin

Tuesday, Dec. 1, T5A-SPBR-1, *Breast Cancer Predicted Up to Twelve Years Ahead of Current Imaging Methods Based on Early Transitional Chemical Changes: Results of a Longitudinal Clinical Study*, John Irvine, Ph.D.

Wednesday, Dec. 2, W5B-SPNR-3, *Structural Brain Network Characteristics and Its Association with Clinical Symptoms in Chronic Low Back Pain*, Huajuan Yang

Thursday, Dec. 3, R5B-SPCA-1, *Myocardial Injury in COVID-19 Survivors—Prevalence Patterns, and Outcomes Assessed with Cardiac MRI*, Vineeta Ojha, M.B.B.S., M.D.

Thursday, Dec. 3, R5A-SPER-1, *Increased Relative Risk of Delayed Posttraumatic Intracranial Hemorrhage in Patients Taking Anticoagulant/Antiplatelet Medications with Concurrent Aspirin: Long Term Clinical Experience in a Large Health System*, Warren Chang, M.B.A., M.D.

Thursday, Dec. 3, R2-SPMK-4, *What Radiographs Fail to Capture; Racial and Sex-Based Disparities in Knee Osteoarthritis Severity, Pain, and Progression*, Mohammad Mohsin Arshad, M.D.

Thursday, Dec. 3, R2-SPNR-12, *Altered Static and Dynamic Spontaneous Brain Activity in Adolescents with Non-Suicidal Self-Injury: A Combined Resting-State fMRI and Machine Learning Study*, Wenhao Jiang
