SUBJECT: NOVEMBER IS NATIONAL LUNG CANCER AWARENESS MONTH

Time: 30 seconds

November is National Lung Cancer Awareness Month.

Lung cancer is a leading cause of death in the United States. Smoking is a major cause of lung cancer, but even if you have never smoked, you can still be at risk. Black Americans are especially at risk for lung cancer and have a greater chance of dying from it.

Research shows that early detection with C-T screening can lower the risk of lung cancer death in some people, based on their age, general health, and smoking history.

For more information visit Radiology-Info-dot-org.
