
RSNA Press Release

RSNA 2025 Technical Exhibits Feature Largest Radiology AI Showcase

Released: September 30, 2025

OAK BROOK, Ill. (Sept. 30, 2025) – The Radiological Society of North America ([RSNA](#)) has announced Technical Exhibits highlights at [RSNA 2025: Imaging the Individual](#), the Society's 111th Scientific Assembly and Annual Meeting, taking place at Chicago's McCormick Place Nov. 30 – Dec. 4, 2025.

Spanning the North and South Halls of McCormick Place, Technical Exhibits will occupy over 415,000 feet of show floor space. More than 660 companies have registered to exhibit thus far, and more than 100 are exhibiting at RSNA for the first time.

"Exhibitors come from all over the world, bringing the latest technology for every facet of medical imaging," said John P. Jaworski, RSNA's assistant executive director of Meeting Services & Corporate Relations. "We're excited to host the largest exhibition in radiology, including the largest exhibition in clinical artificial intelligence."

The AI Showcase in the South Hall houses the latest in AI software and solutions across a 45,000-square-foot show floor. Attendees can view AI Theater presentations, explore RSNA-led AI research and education initiatives and talk face-to-face with exhibitors about how AI can improve clinical workflows. The Radiology Reimagined exhibit hosts a variety of 30-minute interoperability demonstrations that show new ways AI can be integrated into practice. More than 200 companies plan to demonstrate AI and machine learning solutions within the Showcase and at their exhibit booths.

Also in the South Hall, the 3D Printing and Mixed Reality Showcase invites attendees to interact with the latest 3D medical printing and virtual reality technologies. Meanwhile, in the North Hall, the First-Time Exhibitor Pavilion introduces newly exhibiting companies from regions across the globe, offering products and services for every specialty and need.

Publishers, radiology associations and educational institutions have a presence in Educators Row, while Recruiters Row—a must-stop for job seekers—will house 55 recruiting companies. Attendees can have a free professional headshot taken in Recruiters Row for a fresh update to online profiles and resumes.

To help navigate the offerings at RSNA 2025, the new "RSNA Road Trip" feature gives attendees an interactive way to engage with highlights of the Technical Exhibits. Attendees will earn points at each Road Trip destination and qualify to enter a raffle to win RSNA swag.

Some of the featured destinations include a variety of new RSNA Parks. The Bark Park offers a chance to interact with therapy dogs in a calming atmosphere, while Sustainability Parks demonstrate OSCAR, AI-enabled recycling units that advise which trash items go in which bin. Puttology sports a three-hole mini-golf course, and Recharge Parks offer comfortable seating, worktables and charging stations to refresh attendees and devices alike.

During the new Exhibit Hall Social on Tuesday afternoon, attendees can unwind and network with exhibitors and colleagues with food, beverages and interactive experiences designed by participating exhibitors.

Exhibiting companies have scheduled corporate symposia, vendor workshops, lunch-and-learns and AI/Innovation Theater presentations throughout the week.

Technical Exhibits will be open Sunday, Nov. 30, through Wednesday, Dec. 3, from 10 a.m. to 5 p.m. CT.
