

Funding Individual Grant Awards

Research Scholar Grant: The Research Scholar Grant is designed to support junior faculty members who have completed the conventional resident/fellowship training but have not yet been recognized as independent investigators. The grant amount is \$75,000 annually for two years (\$150,000 total) to be used as salary support for the Scholar. Funds are intended to secure “protected time” for the recipient and may not be used for non-personnel research expenses.

Research Scholar Grant Endowment: \$1,500,000
Named Grant For Two Years: \$150,000

Research Resident/Fellow Grant: The Research Resident/Fellow Grant is designed to provide young, not yet professionally established, investigators the opportunity to gain further insight into scientific investigation and to develop competence in research techniques and methods. Grants will be awarded for diverse projects in the radiologic sciences including basic science and clinical research studies. This program is not intended to support those whose primary aim is to obtain practical experience in clinical radiology. The grant amount is \$30,000 salary support for a one-year resident project or \$50,000 salary support for a one-year fellow project.

Research Fellow Grant Endowment: \$1,000,000
Named Grant For One Year: \$50,000

Research Resident Grant Endowment: \$600,000
Named Grant For One Year: \$30,000

Research Seed Grant: The Research Seed Grant is designed to enable faculty investigators to gain experience in defining objectives and testing hypotheses in preparation for major grant applications to corporations, foundations and governmental agencies. The data from these projects will indicate feasibility and appropriateness of the research prior to applying for funds from other agencies. Research Seed Grants are intended to support the preliminary or pilot phase of scientific projects with budgets of \$40,000 or less, not to supplement major funding already secured. No salary support for the principal investigator will be provided. Applications are accepted from individuals throughout the world.

Research Seed Grant Endowment: \$800,000
Named Grant For One Year: \$40,000

Educational Scholar Grant: The Educational Scholar Grant is to fund individuals with an interest in radiologic education. Projects may include, but are not limited to, advanced training in the discipline of education, possibly resulting in an advanced degree/certificate, development and dissemination of educational materials, education in emerging nations, and medical student or resident education. The overall goal of this program is to develop and share knowledge and expertise with the radiology community. The grant amount is up to \$75,000 annually for up to two years (\$150,000 maximum) to be used for salary support and other project costs.

Applications are accepted from individuals throughout the world.

Educational Scholar Grant Endowment: starting at \$600,000
Named Grant For One Year: starting at \$30,000
