Beyond PowerPoint: Innovative Presentation Methods

Mahesh Thapa, MD
Seattle Children’s
thapamd@uw.edu

Objectives

At the end of this lecture, the audience will be able to:

• List three potential alternatives to using simple slideshows for presentations
• Discuss the benefits of creating a presentation based entirely on a movie.
• Explain the concept of a flipped classroom.

Normal Foot Alignment
Lateral-Talar-Calcaneal Angle

Range of angle from birth to 9 years of age is 25-55 degrees

Normal Foot Alignment
Anteroposterior-Talar-Calcaneal Angle

Prezi Pros
• Zoom
• Non-linear
• Dynamic
Prezi Cons

• Dizziness
• Subscription
• Time to learn

Prezi Cost

Creating Line Art in Radiology

Slides for Tutorial
Creating Line Art in Radiology

Movie for Tutorial

Software for Screencasting

- Screenflow
- Camtasia

Best Presentation is No Presentation

Classroom Flipping
Active learning

Engage in activities that promote **analysis, synthesis** and **evaluation** of class content.
“Lectures are a way of transferring the instructor’s lecture notes to the students’ notebooks without passing through the brains of either.”

Edwin Emery Slosson

Video Resources

- Recorded personal lectures
